

WALK COORDINATORS NEEDED

Amyotrophic Lateral Sclerosis (ALS), also known as Lou Gehrig's disease, is a fatal, rapidly progressive neuromuscular disease. Numbers are growing in Manitoba. Money raised in the Walk goes toward ALS research, and helps to provide support to clients and families affected by ALS.

The ALS Society of Manitoba needs Volunteer Walk Coordinators for Walks in rural Manitoba. We need dedicated, organized individuals wishing to donate time, energy and enthusiasm towards managing a 5K Walk for ALS.

Training is offered for those individuals who are interested, but not sure how to coordinate a Walk in your community. Becoming a Walk for ALS Coordinator can help you develop and hone your management and organization skills. We would be happy to give you ideas and advice on how to host your own Walk, based upon many successful Walks throughout our province.
